Overview

A McMaster University Professional Micro-Credential Certificate Course

31 October 2023 | One Day | Live | Virtual

Focused on enabling new leaders within industry business operations. You will understand and adopt essential operations leadership skills to successfully align, direct, and maneuver your teams.

McMaster's Operations Leadership Essentials (OLE) course uses an industry-led approach bringing together senior business leaders to share best practices, lessons learned, tools & techniques. The OLE course enables new leaders within industry by defining their start state, aligning a development path and enhancing interpersonal skills - within an industry 4.0 environment.

This course is designed for new leaders within or entering front-line teams; or those taking on a new leadership role or looking to enhance their skills, build confidence and improve their team's execution efficiency.

Learning Objectives

- Learn about the four Industry 4.0 Leadership styles, your start state, and identify a self-development path best suited to your current or sought-after position.
- Develop an understanding of current industry coaching & mentorship best practices to drive daily coaching or micro-mentorship interactions to increase team accountability and autonomy.
- Understand how to utilize interpersonal & essential communications skills best to mitigate and manage conflicts within your teams, minimizing disruptions.
- Gain an understanding of fundamental leadership skills needed to drive operational resilience within your teams.
