

Leading Transition

Developing leaders for transition to a
Low-Carbon, Circular Economy.

McMaster University Certificate of
Completion Program

COURSE OVERVIEW

🖥️ Online Live 📅 Next Session: February 23 - 25, 2022

The Leading Transition course is a 3-day conference-style professional certificate program where you will receive knowledge, case studies, and tools to navigate Canada's most pressing transition issues and position yourself to help lead a transition from any organization level. Canada's transition to a circular, climate-positive economy depends on courageous leaders from business, government and civil society. New competencies and innovative leadership models are needed to solve the world's most significant transition issues — climate change, resource depletion, social and ecological justice, technology and artificial intelligence. The new mindset expands our focus from efficiency to effectiveness, from crisis to opportunity.

WHAT YOU'LL LEARN

- apply both organizational development and personal leadership lens to explore the drivers of transition
- opportunities to innovate and build competitiveness
- through functional assessment, map your leadership and organizational needs against established leadership models to strategize, plan, and communicate an effective transitional strategy

COURSE STRUCTURE

20

HOUR TRAINING OVER

3

CONSECUTIVE DAYS

Module 1	Personal leadership reflection, psychometric analysis and comparison to established leadership styles
Module 2	Evaluating transitional leadership approached through case studies and expert panel discussion
Module 3	Leading change by setting urgency, building a coalition and creating a vision
Module 4	Communication techniques to ensure the vision is understood, stakeholders are empowered, and short-term wins are well planned
Module 5	Building the business case for transition — tools and techniques for effective evaluation and communication

ADMISSION DETAILS

Participants must hold or be completing a degree or diploma from a recognized university or college; hold a relevant certificate in sustainability from a recognized university; or have equivalent professional experience.

“ The university's Leading Transition course provides lessons learned, theories of change, tools, and resources that can be applied to your everyday work-life, enabling you with the ability to be a change agent. As an employee of a local registered charity, I feel confident in my ability to take my learnings and apply them, transitioning our communities to a more sustainable future. I encourage anyone seeking to be a climate leader in their industry — regardless of role or seniority — to register for this results-driven and inspiring certificate program. ”

— Melissa Schweyer, Marketing & Development at Habitat for Humanity Hamilton
