

McMaster Certificates of Completion

Industry Tactical Operations Execution Workshop

www.mccmcmaster.ca/iolmprogram

Workshop Overview

The aim of this workshop would be to enable industry work center managers & supervisors to leverage the principles of digital leadership, build visual management & digital tools that they can utilize to enhance operations execution efficiency at their businesses/organizations.

Ashan Corea

Industry Operations Leadership &
Management Program Lead
McMaster University
Coreaa@McMaster.ca

Agenda:

- Digital leadership 4.0
- Principles of industry business unit execution
- Employee learner maturity assessment
- Execution principles of a balanced scorecard
- Workcenter visual & digital management tools
- Leveraging digital tools to automate redundant & repetitive tasks
- How to conduct the following briefings:
 - Leadership back brief on a daily plan
 - Team daily morning meeting
 - End shift check-In
- End milestone after-action review

Deliverables

Participants will:

- Create visual management & digital tools tailored to their work centers to enhance personal & team execution efficiency.
- Receive coaching and feedback to enable concise, clear briefings.
- Create personal tools to conduct, capture and drive continuous improvement within their teams.
